### **The Devastating Effects of an EMP Attack**

An electromagnetic pulse (EMP) is a short burst of electromagnetic energy that can damage or destroy electronic devices. EMPs can be caused by natural events, such as lightning strikes, or by man-made devices, such as nuclear explosions. In the event of an EMP attack, the power grid would be knocked out, communications would be disrupted, and society would collapse.

The effects of an EMP attack would be devastating. Without electricity, we would lose access to all of the modern conveniences that we rely on, such as running water, refrigeration, and transportation. We would also be unable to communicate with each other or access information. In a matter of days, society would descend into chaos.

In *Extinction Pulse*, the survivors must learn to adapt to a world without electricity. They must find new ways to obtain food, water, and shelter. They must also learn to defend themselves from the dangers that lurk in the shadows.
